

Special assemblies of the control stations

To order a complete control station in a bespoke assembly choose the actuators and indicator lamp holders from the catalogue, assign required switches and lamp holders and write their codes in the diagrams below.

- 1 - actuator type / lamp holder
- 2 - switch type / lamp holder

Example

Single opening control station with mushroom head actuator (D) yellow (G) with normally closed switch (01) and terminal marks 11-12
