Signal tower 70 mm, complete, red LED

Ordering code

LT70\1- ☐

		Power supply
230	230VAC
24	24VDC

## Product description

From safety and production control point of view, signal towers are indispensable parts of modern machines and automated production processes. Signal towers allow to quickly assess the machine or line condition, and in an emergency, they can work as visual and audible warning devices. The additional feature of signal towers is emergency warning about malfunctioning of a device or a potential threat.

Position of the switch

◼▢▢ rotating light
▢◼▢ flashing light
▢▢◼ continuous light

Technical data

Weight	220 g
